Mobarakeh Steel's Mineral Economy Strategic Arm

Hassanalighodshanass

A Word from the CEO of Mobarakeh Steel Mineral Supply and Processing Group

CEO of Mobarakeh Steel Mineral Supply and Processing

In today's Iranian and global economy, the security and resilience of the supply chain have become a defining competitive advantage and even a prerequisite for survival in industries. The steel industry, as the driving force of the country's industrial and economic development, has a high dependency on the stable supply of mineral raw materials. Global experiences show that leading companies in this industry, by moving towards vertical integration and controlling key links in the chain from mine to market, have been able to act more resiliently against price fluctuations, logistical challenges, and geopolitical developments, creating greater stability.

Mobarakeh Steel Group, understanding this necessity, has purposefully entered the field of mineral economics for over a decade. During the current management period, with a forward-looking and wisdom-based approach, efforts have been made to play an effective role in the flourishing of the country's mining sector by relying on specialized human capital, financial capacity, technical knowledge, and a commitment to sustainable development.

The full realization of this mission requires the cooperation and support of policymaking and legislative bodies, as well as intra-industry synergy, which can pave the way for a leap in production, self-sufficiency, and strengthening the supply chain security of the country's steel.

In this regard, Mobarakeh Steel Group pursues the development of its mining activities based on the principles of responsible and sustainable development and seeks to play a more active and effective role in corporate governance, especially in the mining industry. This approach is accompanied by a precise understanding of stakeholder expectations and transparent responsiveness to them, emphasizing the creation of long-term and empowering relationships.

The utilization of new technologies, especially artificial intelligence and digital mining, as key drivers for increasing productivity and achieving the group's strategic goals, has been put on the agenda.

Within this framework, Mobarakeh Steel Mineral Supply and Processing Company, with a responsible and forward-looking approach, has defined its mission as the sustainable supply of iron ore, concentrate, pellet, and other mineral materials required by the Mobarakeh Steel Group. The company's vision is to achieve the position of a transcendent organization with the capacity to supply 10 million tons of iron ore concentrate annually and achieve at least 800 million dollars in operational revenue by 2031. The company's strategic direction is based on a smart combination of exploration development, increasing production capacities, product diversification, operational excellence, and investment in human capital; a set that together charts the path to achieving a distinguished position in the country's mining industry and creating sustainable value for stakeholders.

Core Strategies of the Group

Developing exploration and production capacities, mineral supply, and the required infrastructure.

Developing human capital and enhancing the productivity and commitment of employees.

Developing new and innovative mining businesses.

Sustainable development with a focus on governance.

Maximizing and economically utilizing the investments and mineral and industrial capacities of the holding.

Introduction to Mobarakeh Steel Mineral Supply and Processing Holding **From the heart of the earth to the core of industry**

Undoubtedly, in today's volatile economy, sustainable and reliable access to mineral materials is considered one of the most important competitive advantages for leading steelmakers worldwide. In this regard, Mobarakeh Steel Mineral Supply and Processing Holding, as the specialized and strategic arm of Mobarakeh Steel Group, is responsible for guiding and managing the mineral, processing, and raw material supply chain. The main mission of this holding is to guarantee the security, sustainability, and productivity of the steel supply chain, from the exploration of mineral reserves to the delivery of processed materials to steelmaking plants.

With over 15,000 square kilometers of exploration areas and more than 80 active and developing mining concessions, this holding is considered one of the largest and most strategic players in the country's mining chain. Due to the gradual depletion of high-grade iron ore reserves in the country and the intensifying competition for access to resources, the holding has placed a comprehensive and long-term exploration program on its agenda. The goal is to identify, evaluate, and transform new reserves into economic and sustainable mining projects to support steel production in the coming decades.

Alongside focusing on iron ore, the holding's strategy is also based on intelligently diversifying its mineral portfolio. Developing activities in areas such as lead and zinc, lime and dolomite, gold, copper, lithium, and other rare elements, as well as recycling and processing mine tailings, will increase added value, reduce risk, and pave the way for the formation of a resilient and multi-product mineral chain for Mobarakeh Steel Group.

In summary, Mobarakeh Steel Mineral Supply and Processing Holding is indeed the beating heart of Iran's steel raw material security. It is a structure that has guided Mobarakeh Steel from dependence on volatile markets to ownership and management of strategic mineral resources, and from uncertainty to strategic stability and long-term competitive advantage.

Company

Historical Overview:

- Undertaking mineral activities and investments in iron ore mines, procurement of raw materials including iron ore and concentrate, and trading of ferroleads and master alloys

2024

- Transformation of the company from a mineral trading entity to Mobarakeh Steel Holding Company; acquisition of shares in mineral companies, including Folad Sang, and Matil Hamayr Trading Development Company, expanding into new mineral businesses, establishing Maham Parsian Yazd Company, and also Sarband va Rooy Sarri Gol Company, and Ardakan Zharf Kavanan Company.

2026

Product Portfolio: From Earth's Core to Industrial Heart

Strategic Minerals in the Steel Value Chain:

Ardakan Zharf Spadana:

Technical and Engineering Services in Mining and Exploration

Sari Gol Lead and Zinc: Zinc Ingots, Lead Concentrate

Mobarakeh Steel: Iron Ore, Limestone

Maham Parsian: Iron Ore Lumps

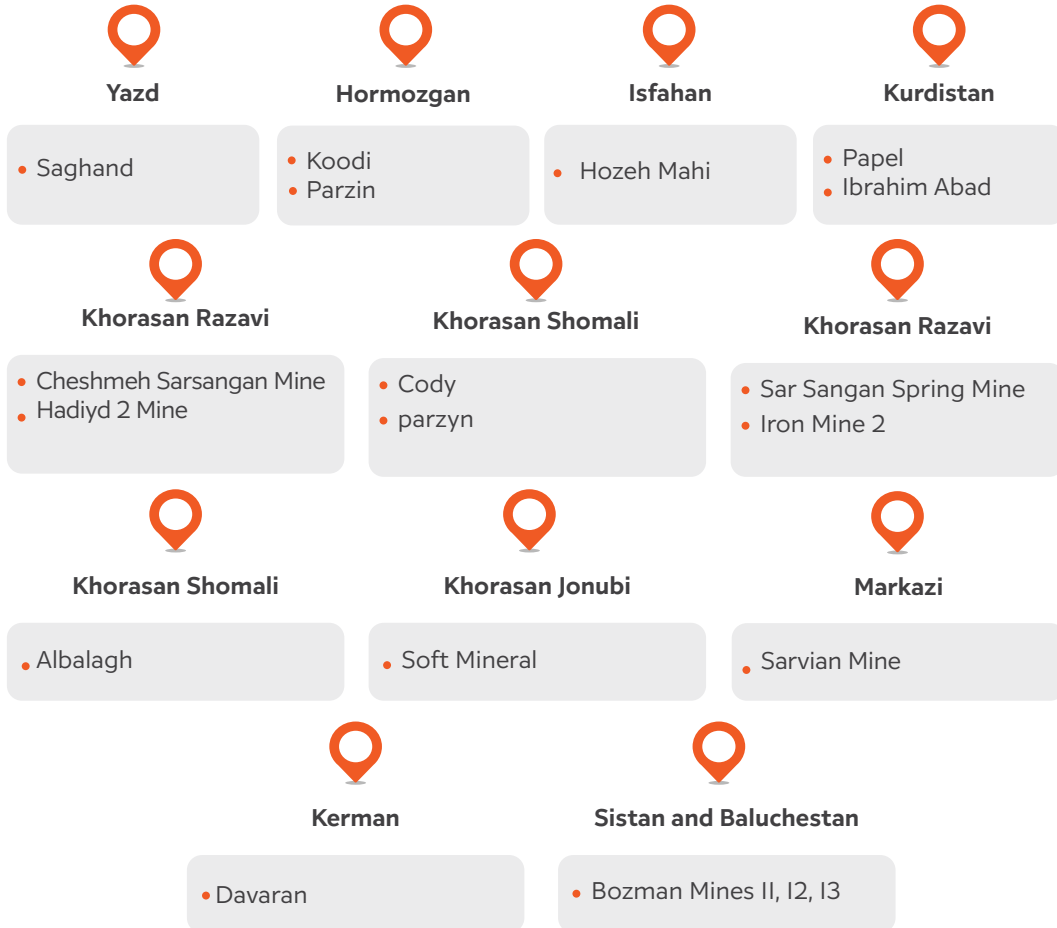

Matil Hamayr Trading Development: Concentrate, Logistics

Our Mines:

Zharf Kavanan Spadana
Company

Zharf Kavanan Spadana Company:

Zharf Kavanan Spadana is a specialized mining engineering company that leverages its deep technical knowledge and extensive operational experience to identify, explore, and validate the potential of metallic and non-metallic mineral resources. This company serves as a bridge between geological data and feasible economic plans.

 Field of Activity	Mining
 Year of Establishment	1403 (Persian calendar)
 CEO Name	Amir Masoud Ghazvini Zadeh
 Company Address	Isfahan, Shahid Ghadousi (Apadana First) Street, Ayeneh 7 Alley, No. 19
 Contact Number	031-36641212

♦Main Mission:

To ensure the sustainable development of mineral resources through precise exploration, providing reliable technical studies, and transforming discovered reserves into profitable and optimized extraction projects.

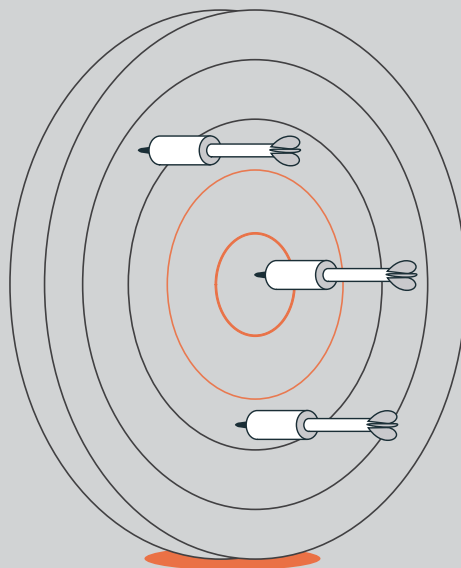

♦Products and Services:

Engineering, consulting, and supervision services for all mining activities.

- Providing laboratory services
- Providing geophysical services
- Providing drilling services
- Providing mining engineering services in exploration and extraction
- Executing research and study projects
- Providing services to companies outside the Mobarakeh Steel group
- Providing services to companies within the Mobarakeh Steel group
- Identifying virgin and potential areas in neighboring countries
- Completing exploration and determining the status of areas transferred from Folad to the Holding
- Completing exploration and supervising the extraction of hematite mines in Rafsanjan and Hormozgan with Folad Sang Company
- Supplementary exploration and supervision of the extraction of Sarvian iron ore mine with the Supply and Processing Holding
- Logging of drill cores from the Saghand anomaly and block
- design and open-pit design for the Saghand 5 anomaly with Maham Parsian Company
- Completing exploration of joint venture areas with Tamas Company

Foolad Sang Mobarakeh
Isfahan Mining and
Industrial Company

Foolad Sang Mobarakeh Isfahan Mining and Industrial Company

Foolad Sang Mobarakeh, as one of the oldest affiliated units of the Mobarakeh Steel group, plays a vital role in supplying raw materials to the steel industry.

	Field of Activity	Exploration, extraction, processing, and supply of mineral materials required by the Mobarakeh Steel group.
	Year of Establishment	1371 (Persian calendar)
	Services	All services for the design and execution of exploration, extraction, and operation activities of metallic and non-metallic mines.
	CEO Name	Amir Hossein Karimjadi
	Company Address	25 km of Mobarakeh-Boroujen Road, Foolad Sang Mining and Industrial Company
	Contact Number	031-52682020
	Website	www.fsmc.ir

♦ **Main Mission:**

To purchase, acquire, explore, extract, process, and operate mines for limestone, dolomite, ferroalloys, and other minerals required by the steel industry, with a focus on the needs of the Mobarakeh Steel Isfahan group. To supply a significant portion of the mineral raw materials needed by the steel industry and maintain its current position as the largest producer of lime products for the steel industry in Iran.

♦ **Products and Services:**

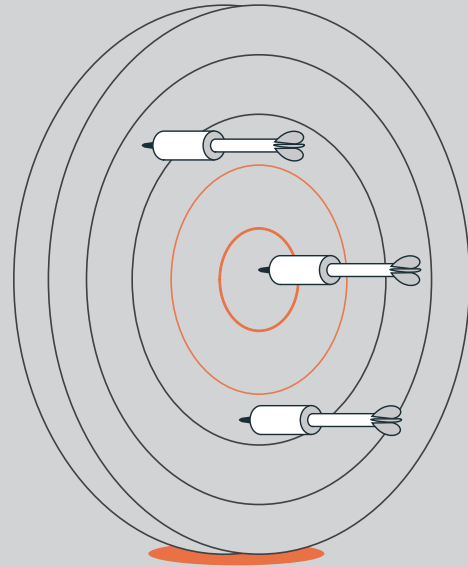

- Limestone
- Calcined Lime
- Hematite

Future Plans

- Operation of Phase 3 furnaces for the production of calcined lime and dolomite.
- Supplementary exploration and capacity increase for hematite iron ore mines in Kerman and Hormozgan provinces.
- Execution of research and development projects for a circular economy in the field of lime fines.
- Execution of projects for monitoring and smartening mining machinery and production lines and operations.

Sari Gol Lead and Zinc

Mining and Industrial
Company:

Sari Gol Lead and Zinc Mining and Industrial Company:

This company is responsible for the complete lifecycle of the Sari Gol lead and zinc mine for a period of 14 years.

 Field of Activity	Mining and Industrial
 Year of Establishment	1402 (Persian calendar)
 CEO Name	Vahid Ebadi Vala
 Company Address	Esfahan, Imam Khomeini Street, Forumandi Street, between Forumandi 7/5 Isfahan, North Tawhid, Almas Building, Unit I
 Contact Number	031-52682020

♦Main Mission:

To ensure the highest economic return from the Sari Gol mine over 14 years through integrated management from exploration to the sale of final products.

♦Products and Services:

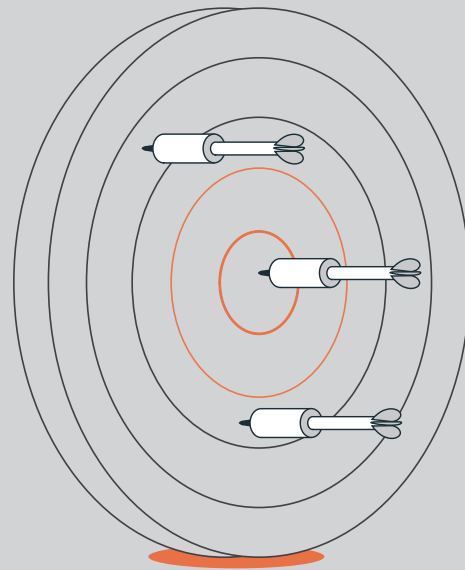

- Zinc Ingots
- Lead Concentrat

Plans

- Completing the exploration and extraction operations of the Albalagh mine.
- Establishing a zinc ingot processing plant with a capacity of 10,000 tons.
- Establishing a lead concentrate plant with a capacity of 2,000 tons.

Maham Parsian Mineral

Production and Supply
Company:

Maham Parsian Mineral Production and Supply Company:

Maham Parsian Mineral Production and Supply Company began its operations in Yazd province, near the Saghand iron ore mines, with the aim of playing an effective role in the value chain of the country's steel industry and promoting sustainable utilization of mineral resources. Relying on modern technologies in the extraction and production of high-grade iron ore concentrate, the company strives to sustainably supply raw materials for steel industries, including the Mobarakeh Steel group, while also playing an effective role in job creation, economic progress, and environmental preservation with a responsible and development-oriented approach.

 Field of Activity	Exploration, extraction, operation, and processing for the production of iron ore
 Year of Establishment	1403 (Persian calendar)
 CEO Name	Mohammad Qobadi
 Company Address	Yazd, University Blvd., Jeyhoun Yazdi St., Jeyhoun Sixth Dead End, No. 5
 Contact Number	035-38411520
 Website	www.tammco.ir

♦Main Mission:

Sustainable exploitation of mineral resources based on modern technology, improving product quality, environmental preservation, and social responsibility, with the aim of supplying iron concentrate for domestic and global industries and creating added value for stakeholders.

♦Products and Services:

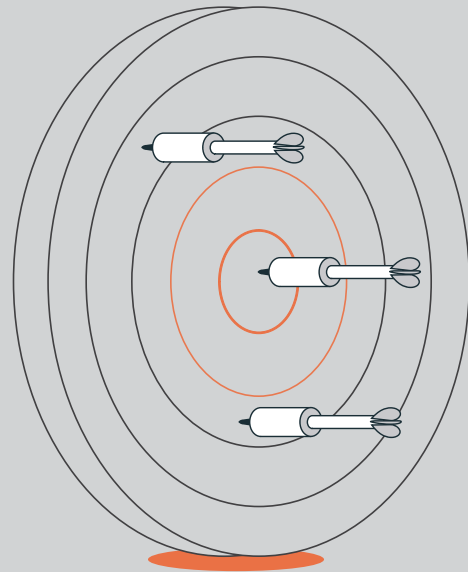

Iron Ore Lumps

Plans

- Planning to achieve an annual extraction target of 17 million tons of mineral material and 160 million tons of

Metil Hamayr Commercial
Development Company:

Metil Hamayr Commercial Development Company:

Metil Hamayr Company, with a commercial approach focused on improving the supply chain, plays a fundamental role in processing and delivering mineral materials to large industries. This company is specifically active in supplying and converting iron ore into concentrate, as well as supplying a portion of the concentrate needed by Mobarakeh Steel.

 Field of Activity	Commercial, production, and supply of raw materials (concentrate) for Mobarakeh Steel.
 Year of Establishment	1396 (Persian calendar)
 CEO Name	Sadegh Sarhadi
 Company Address	Tehran, Vanak St., Mola Sadra St., South Shirazi, West Garmsar, Meftah Alley, No. 84
 Contact Number	021-88626825
 Website	www.Metilhamyar.ir

♦Main Mission:

Sustainable and efficient supply of mineral materials from extraction to final delivery, focusing on improving concentrate quality and optimizing the timing throughout the entire supply chain.

♦Products and Services:

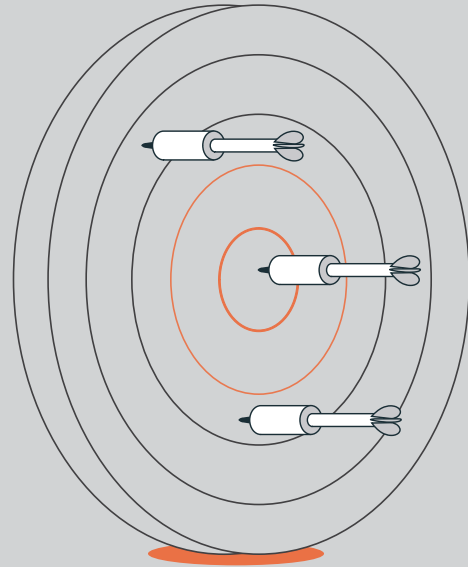

- Production and supply of iron concentrate
- Homogenization and capacity building
- Combined rail and road transportation

Plans

- Making 3 factories with a capacity of over 300,000 tons available in the west, central, and northeastern regions of Iran for converting iron ore into concentrate.
- Exploring new opportunities in domestic or foreign markets and entering the concentrate and iron ore export market.
- Continuous supply of iron ore and concentrate from domestic sources in accordance with the production plan.
- Entering into toll production contracts with concentrate production factories that have spare capacity.
- Identifying and evaluating new suppliers to reduce the risk of dependency and increase the diversity of supply sources.
- Improving logistics processes and procedures to increase efficiency.

Supply Chain Security, Enduring Power

Mobarakeh Steel's Mineral Supply and Processing Group, by relying on the integration of the value chain, intelligent management of mines, and responsible development of mineral resources, guarantees the stable supply of raw materials for steel. Today, this holding is not just a supplier, but a strategic arm of Mobarakeh Steel for resilience, competitiveness, and the long-term development of Iran's steel industry.

Coming soon

From the depths of the earth to the pulse of industry.
